Access and replace the filter to you Samsung POWERbot VR9000 vacuum

Written By: Josh Brouwer

## INTRODUCTION

This guide will teach you how to access and replace/clean the filter of your POWERbot. This can be done to make your POWERbot clean more efficiently and prevent damage to your machine.

## Step 1 — Filter

- Turn off the emergency switch on the bottom of the power bot.

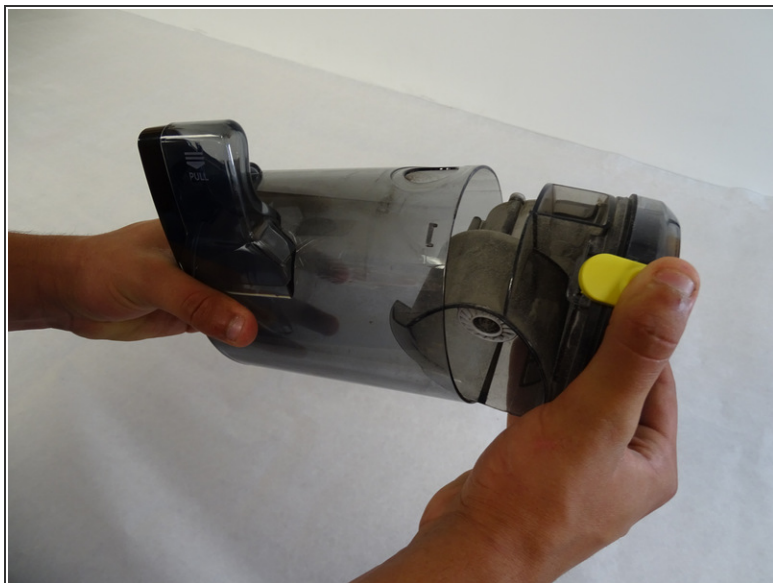

## Step 2

- Gently pull up on the dustbin handle to to remove it from the rest of the power bot.

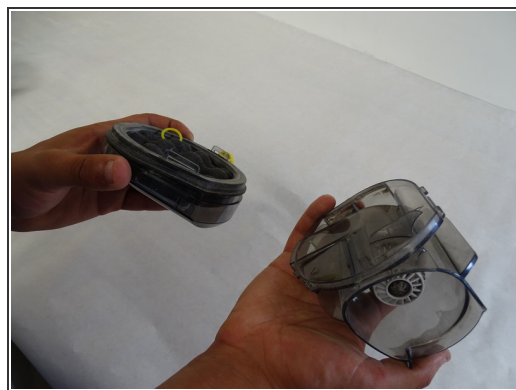

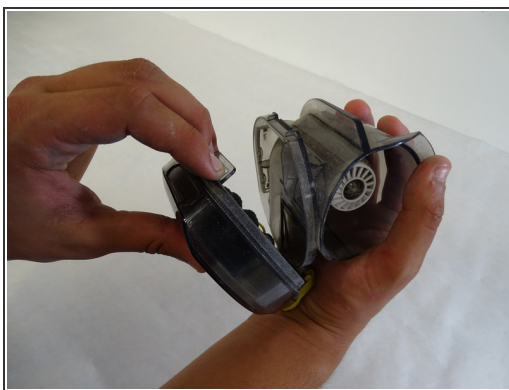

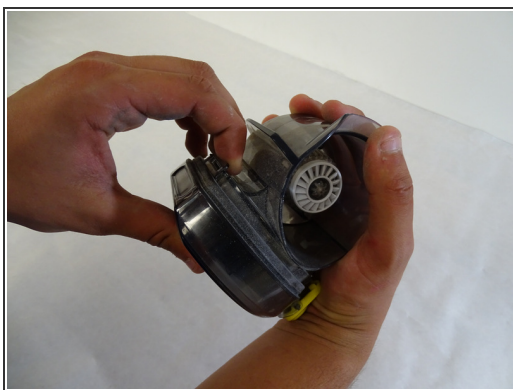

## Step 3

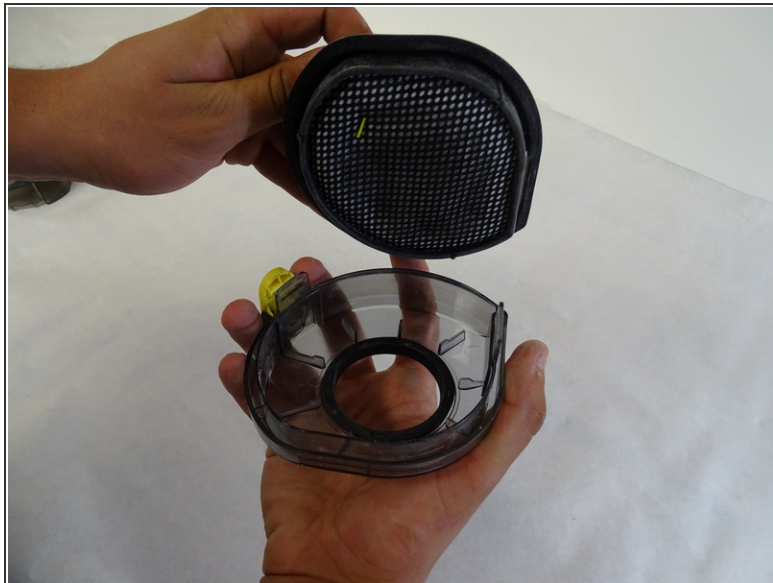

- Push down on the yellow button to remove the dustbin cover.

## Step 4

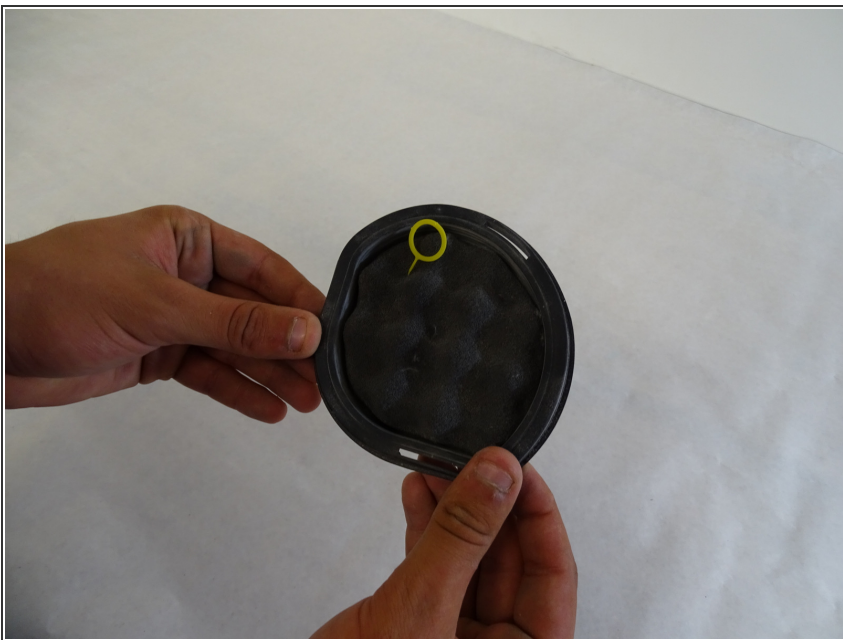

- Separate the dustbin cover from the filter.

## Step 5

- Pull gently on the yellow tab to remove the filter from the cover.

## Step 6

- The filter is removed. You can dispose of collected dust or rinse the filter with warm water before replacing.

To reassemble your device, follow these instructions in reverse order.
